

S+D Institute is an educational organization with the goal of providing students with experience working in a fabrication environment through internships and workshops. The centerpiece of the Institute is an internship program for students from the United States and India. The internships will be to support the development of video and documentation collateral for the Institute's educational program, and as part of that process, to learn about fabrication and implementation skills. The internships, which pay a stipend, involves interviews, fabrication support, taking pictures and shooting videos, and supporting the overall structure of the fabrication educational program.

Apply for a S+D Internship program by contacting Craig Berger and [craig\\_berger@fitnyc.edu](mailto:craig_berger@fitnyc.edu). To apply for an internship, include:
